

INO-46016

« Hands-Free » Hand Dryer White

Surface mounting or recessed wall mounting options are available. Fully automatic, the dryer is activated by an infrared sensor when hands are placed under the air-outlet and has a 35 seconds lockout feature if hands are not removed. This hand dryer is equipped with a 5/8 HP, 20,000 RPM motor producing an air volume of 16,000 linear feet per minute. Drying hands is 3 times faster than ordinary dryers; its energy consumption will reduce electricity cost. The INO-46016 can bring up to 90% savings versus paper towel costs and 80% savings on electricity consumption versus regular hand dryers.

This dryer can be used wherever people wash their hands and hygiene is important:

Bathrooms Hospitals Washrooms
Kitchens Dressing Rooms Etc.
