

Ino-bio 3

CARPET AND TEXTILE CLEANER AND SPOTTER

INO-BI3 378

Ino-bio 3 cleans, biodegrades organic matter and eliminates odors. It is ideal for cleaning carpets, area rugs, sofas, car upholstery, curtains and other surfaces covered with fabric. **Ino-bio 3** replaces many carpet products like spot cleaner, bonnet cleaner and shampoo.

Benefits

- Safe for the users' health
- Safe for the environment
- Does not damage carpet and fabric fibers
- Hypoallergenic
- Continuous cleaning action
- Odor controller
- One product for multiple applications
- Completely biodegradable
- Neutral pH
- Certified Ecologo
- Made in Canada
- Highly concentrated product: less packaging

CAN BE USED WITH THE FOLLOWING ACCESSORIES:

Ino-bio 3

CARPET AND TEXTILE CLEANER AND SPOTTER

INO-BI3 378

Directions

Before use, always check for colourfastness with a spot test in a hidden area. Vacuum the carpet with a vertical vacuum cleaner before and after cleaning, when it's dry, in order to shake and place back the carpet fiber.

SPOT REMOVAL : 1. Dilute **Ino-Bio 3** at 1:20. **2.** With a spraying bottle, spray liberally on the spot. **3.** Using a soft-bristled brush or a clean rag, gently brush the surface in a circular movement, working from the spot's edges towards the centre. **4.** Absorb any excess cleaning solution with a clean and dry rag.

CLEANING WITH AN EXTRACTOR MACHINE : Follow the manufacturer's instructions for using the extractor. **1.** Dilute **Ino-Bio 3** at 1:50. If carpet is heavily soiled, pre-spot liberally these areas, let stand and then begin extraction. **2.** If needed, use dryers to accelerate the drying time. **3.** Spots can be pre-sprayed at a 1:20 dilution rate before cleaning.

SHAMPOO METHOD : 1. Dilute **Ino-Bio 3** at 1:50 and fill-up the polishing carpet machine's tank (equipped with a brush). **2.** Start shampooing doing circular movements from left to right, carefully insisting on tough stains. **3.** If needed, use dryers to accelerate the drying time.

BONNET METHOD WITH ROTATING MACHINE (can also be done with a pad) : **1.** According to the type of machine used, fill-up the rotating machine tank or a bucket with a 1:50 dilution of **Ino-Bio 3** solution. **2.** Wet the bonnet or pad with the solution and start cleaning doing circular movements from left to right, carefully humidifying and insisting on tough stains. **3.** To make sure to cover the entire surface, it is important to overlap every section by 2 to 4 inches. **4.** Change bonnet or pad frequently by soaking it in the solution (when using a bucket) and wring it. It is suggested to work with 2 bonnets or pads, especially in most dirty sections.

SPRAY & VAC METHOD (carpet maintenance: surface cleaning) : The Spray & Vac method is a periodic cleaning procedure that helps maintain carpets clean in entryways and heavy-traffic areas. **1.** Vacuum the carpet. **2.** Dilute **Ino-Bio 3** at 1:75 in a garden pump or Innu-Sprayer machine's tank. **3.** Spray solution, in a fine mist, on the area to be cleaned and a little beyond, without drenching the carpet. **4.** Let stand and vacuum after 12 to 24 hours. No need to rinse. **5.** Repeat as needed. The Spray & Vac method is done quickly and is easy to integrate into a daily routine after vacuuming.

When poured regularly in drains and pipes, **Ino-Bio 3** used solution prevents bad odors and obstructions.

DILUTIONS

Ino-bio 3 Carpet and textile cleaner and spotter (cold water)		
Spot removal	1:20	50 ml/L of water
Extractor/Shampoo/Bonnet method	1:50	20 ml/L of water
Spray & Vac method	1:75	13 ml/L of water
